

# Hatch-a-Match

Haley Fletcher  
January 23, 2019

## Project Description

---

- A matching program for bigs and littles
- Designed using a genetic algorithm for matching up mentors and mentees of organizations based off of preferences

# User's POV

---

- User will open the website
- User will input big & little names
- User will input each participant's preferences
- User will receive an email containing the full list

# Why Me? ---

Why this project is important to me:

- I have 4 littles and 2 bigs
- My roommate is in Greek life and this process at scale is a huge source of drama

Why it's a good use of my abilities:

- I LOVE algorithms
- I want to make things as simple as possible for people
